Adrian Capraru

Head of AI & Automation | Production AI Agents for Finance, Accounting and Operations

Bucharest, Romania (CET+1) | EU citizen | Remote EU, B2B contract or employment
adriancapraru27@gmail.com | linkedin.com/in/adriancapraru27 | github.com/cadi27tech

EXECUTIVE SUMMARY

Builder-operator who takes AI systems from first commit to production and runs them for finance, accounting and operations teams. 6 years in FinTech product and operations, including COO through an EU crowdfunding licence, plus 2 years shipping AI automation in production. Founder of a 200+ printer manufacturer.

CORE COMPETENCIES

AI Strategy & Roadmap | Production AI Agents | Agentic Workflows | Workflow Automation | Document AI | Evals & Regression Testing | Human-in-the-Loop Design | AI Governance & GDPR | Finance Operations Automation | Systems Integration (APIs, Webhooks) | Multi-Tenant SaaS Architecture | Operations Leadership

SELECTED ACHIEVEMENTS

- Took an Irish accountancy firm's 20-module multi-tenant SaaS from first commit to live production in 10 days, gated by 3,000+ automated checks and an 87-point smoke test on every deploy.
- Built an EU-hosted AI bills reader at 99.8% field accuracy on a synthetic test corpus, for under one cent per document, posting to Xero with VIES checks and SEPA payment files.
- Put finance automations into daily production: prepayment journals validated 107/107 against the bookkeeper before go-live; deal-to-invoice-to-payment across 3 legal entities and 4 currencies, 212+ invoices since Apr 2026.
- Founded 3Descu on an EU grant and grew it from 5 printers in an apartment to 200+: turnover x65 in three years, about EUR 190K in 2025 at a 57% net margin; built its entire software platform solo (~400 merged pull requests).
- As COO, led operational and compliance readiness for an EU crowdfunding (ECSP) licence granted by the Romanian regulator ASF in March 2024; cut investor KYC onboarding from about 45 to 8 minutes.

PROFESSIONAL EXPERIENCE

Portfolio career since 2022: fractional AI lead, studio co-founder, founder and independent consultant in parallel; the COO role ran alongside until Oct 2025.

Director of AI & Business Automation (Contract), M.A. Whately & Co. Oct 2025 - Present

Irish chartered accountancy practice. Leads the firm's automation function: builds for the firm and its clients, sets scope with the principal, validates with the bookkeepers, trains staff, and directs parallel AI coding agents under human review.

- Took the firm's client-facing SaaS from first commit to live production in 10 days (23 Sep to 3 Oct 2026), then to 20 modules in four weeks: bills, VAT, payments, credit control, tax deadlines, proposals and an AI assistant.
- Built an EU-hosted AI bills reader (two Gemini models on Vertex AI EU with consensus, Claude as fallback): 99.8% field accuracy on a synthetic test corpus, 97.6% on the browser path (up from 86.7%), zero silent errors, under one cent per document; posts to Xero with VIES checks and SEPA pain.001 payment files.
- Designed for a regulated profession: tenant isolation (Postgres RLS), AML/CDD gate, audit log, GDPR retention purge, SSL Labs A; the AI assistant acts only on user confirmation, under the user's own permissions, with cost caps.
- Rebuilt the practice's client-management system (ClickUp, n8n, Xero): 587 client records migrated, 97-field schema cleaned, 3,172 writes with 0 failures, dashboards for 10 staff plus the owner; kept a bulk payroll job on dry-run until it matched Xero exactly (38 tasks, not 587).
- Delivered automations for the firm's clients: Xero prepayment journals for a tour operator, validated 107/107 against the bookkeeper's own entries before go-live and running daily since 16 Oct 2026; a SEPA payment-file converter (18/18 tests, parity with the bank's own XML) productised as a monthly subscription; a co-op's first automated settlement cycle (Sage to Xero, 5-source statement reconciliation).

Co-Founder & Automation Architect, Systemartis 2023 - Present

Bucharest AI systems studio (team of 4) building AI agents and automation for B2B clients; bullets are studio results.

- Studio case study: internal "AI operational brain" for a client business, with about 70% less founder dependency, 20+ hours a week returned and 99.9% availability over six months (studio-reported).
- Pricing intelligence and order automation for Innovium, the founder's own brand (related party): 9 spreadsheets replaced and +40% sales after the pricing layer went live.

Founder, 3Descu (TREIDESCUPRINT SRL) Jun 2022 - Present

3D-printing manufacturer for engineering buyers. ISO 9001:2015 certified company, team of 4 incl. contractors, no outside equity.

- Started on an EU start-up grant (business plan ranked first) with 5 printers in an apartment; grew to 200+ printers and turnover x65 in three years, about EUR 190K in 2025, +75% year on year, at a 57% net margin (public filings).

- 2,000+ orders from 1,600+ buyers in 30 countries (45% to Germany, 1 in 3 from returning customers); rated 4.7/5 by 200+ verified buyers; audited production partner of one of the largest on-demand manufacturing platforms in the EU.
- Built the company's quoting-to-fulfilment platform alone with AI coding agents in under five months (React, TypeScript, Supabase, Stripe): 929 commits, ~400 merged pull requests, 38 edge functions, 4 languages; every release gated by 120+ automated checkers (~260K assertions per run).
- Shipped one of the first manufacturing MCP servers, so engineers get a real factory price inside ChatGPT or Claude; listed in the official MCP Registry, on Glama and in 4 community directories via merged pull requests.

Independent AI Automation Consultant (Top Rated on Upwork), Upwork and direct clients — Dec 2025 - Present

Top Rated, 100% Job Success: 22 contracts, 12/12 rated contracts five-star, $13K+ in 12 months, one client rehired 4 times, all inbound.

- Automated deal-to-invoice-to-payment for a multi-entity B2B software reseller (direct engagement): HubSpot to Xero across 3 legal entities and 4 currencies, live since Apr 2026, 212+ invoices; HMAC-signed approvals, idempotency and dead-letter retries; a pre-launch audit fixed 9 bugs (2 critical), then a 49-assertion regression harness.
- EU-sovereign multi-tenant financial reporting platform for a Dutch education-sector client (self-hosted Supabase and n8n, Next.js, Entra ID SSO, Exact Online); tenant isolation proven by 52/52 sign-in and 5/5 RLS mutation tests; each phase at or under budget, follow-on module won at a fixed price.
- Daily revenue reporting for a five-hotel group (6 reports a day) matched to the accountants' figures cell by cell, surfacing 2 accounting errors; cloud pipeline alerts on missing documents.
- Self-improving LLM pipeline for safety-critical PLC code migration: translator, adversarial validator and improver roles, regression-locked on a 300-case dataset with a SQLite audit trail; five stars plus a bonus.

Founder, Innovium (own consumer-products brand) — Oct 2023 - Present

EU trademark (9 classes), 66+ products on eMAG, about EUR 50K revenue in 2025, profitable; n8n pricing and order automation.

Chief Operations Officer, HighCrowd — Oct 2022 - Oct 2025

Romanian real-estate crowdfunding platform, taken from pre-licence to an EU-licensed (ECSP) marketplace.

- Led operational and compliance readiness (penetration testing, documentation, architecture review with the regulator) for the EU crowdfunding (ECSP) licence granted by ASF in March 2024, Romania's 4th and the 2nd for real estate.
- Designed investor onboarding on LemonWay with KYC, AML checks and bank linking, cutting onboarding from about 45 to 8 minutes per investor (internal measure).

Head of Community, InRento — Oct 2021 - Jun 2024

Real-estate crowdfunding platform; the company was named Investment Tech of the Year 2022 (Europe FinTech Awards).

- Ran investor communications and the phased migration plan through the 2022 EvoEstate-InRento merger (12,000+ combined investors); produced the platform explainer video (14K+ views).

Product Manager, EvoEstate — Mar 2020 - Oct 2021

Pan-European real-estate crowdfunding aggregator with 6,700 investors.

- Promoted from Community Manager to Product Manager in 8 months; owned the product roadmap and the secondary market; produced the platform explainer video (25K+ views).

TECHNICAL SKILLS

AI: Claude, Gemini (Vertex AI EU), GPT-4o, MCP servers, tool-calling agents, document AI, eval harnesses, Claude Code
Automation: n8n (self-hosted), GitHub Actions, webhooks (HMAC), Make, Zapier
Finance systems: Xero, HubSpot, Exact Online, Sage, Dext, Stripe, LemonWay, SEPA pain.001, VIES
Engineering: TypeScript, React, Next.js, Python, SQL, Supabase / Postgres (RLS), Vercel, Docker, Playwright

EDUCATION

Master's, Entrepreneurship & Business Administration, "Constantin Brancusi" University, Targu-Jiu | 2020 - 2022

BBA, Marketing (English programme), Bucharest University of Economic Studies | 2017 - 2020

CERTIFICATIONS

IBM AI Product Manager - IBM, via Coursera (Oct 2025); Fintech: Foundations & Applications of Financial Technology - The Wharton School, via Coursera (Sep 2025); Agile Approaches for Modern Leadership - Duke University, via Coursera (Oct 2025); AWS Cloud Solutions Architect - Amazon Web Services, via Coursera (Oct 2025)

PRESS & RECOGNITION

Featured Oct 2026 in Profit.ro, Observator News, 3D Printing Industry, 3Druck.com and Romania Journal (10 articles in a week, zero ad spend). 3Descu ranked 1st in Gorj county in 3 ListaFirme Topul Firmelor 2026 categories. Co-author of a 17-lesson crowdfunding course and a 70+ page P2P guide; 3x Banii Vorbesc podcast guest.
